

electrophoresis automated system

GiantIFE

The most advanced electrophoresis system for
IMMUNOFIXATION

socimed

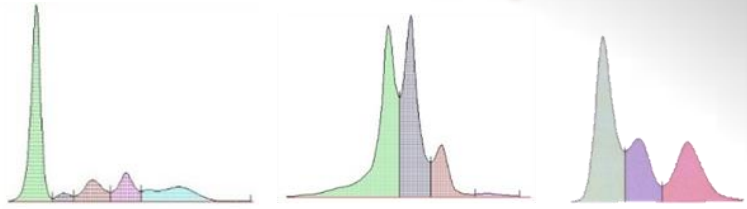

VENTE DE CONSOMMABLES ET D'APPAREILS MÉDICAUX
Tel. +331 49 98 86 72 - socimed@socimed.com

electrophoresis automated system

Versatile

Allows to perform the most spread techniques: Serum Proteins – Haemoglobins – Lipoproteins – Immunofixation.

Serum Proteins

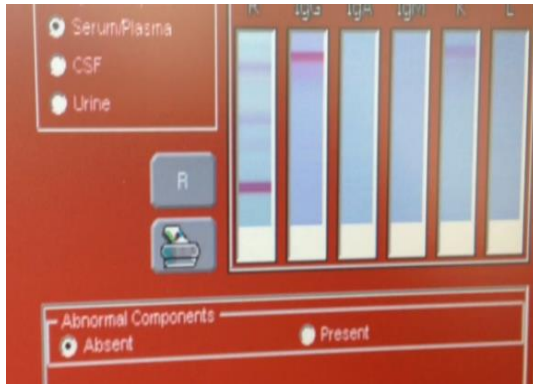

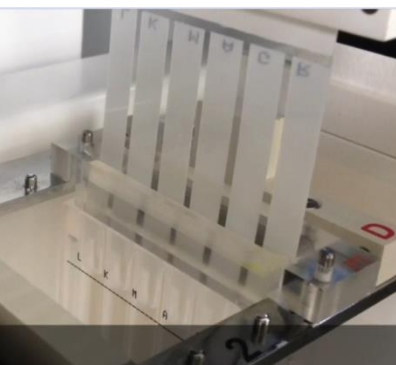

Haemoglobins

Lipoproteins

complete/walk-away/accurate

GiantIFE automatically arranges the loading of all the reagents, to standardize the delicate electrophoretic process.

Automated Ag/Ab reaction contact

Integrated webcam for results survey

Clear and friendly software, for a complete patient report

productivity Serum-Proteins : 40 samples/ Lipoproteins; 40 samples// Haemoglobins: 40 samples
Immunofixation: 5 samples

software features

- Operating system: Microsoft Windows XP/Vista/Seven
- User interface: monitor, keyboard and mouse
- Minima recognition: automatic
- Managing techniques: adjustable techniques in times, migration voltage/current and wavelength

...your partner in Protein Electrophoresis
